

Attorney Docket No.
014354.0002

PATEL APPLICATION

ABSTRACT OF THE DISCLOSURE

5 A system for processing transaction data and payment
data is provided. The system includes a front-end system
that receives transaction data from one or more merchants,
such as an employee identifier. A back-end system receives
payment data from one or more payment systems, such as fraud
data. A reporting system that is connected to the front-end
10 system and the back-end system correlates the transaction
data the payment data, such as to show employee identifier
data and fraud data in a single record.
